RPW9 Water Cooler

The newly designed RPW9 provides the absolute highest-quality premium purified water by utilizing a 5-stage reverse osmosis water purification process, producing the purest hot and cold water you can drink. The taller design allows for a more comfortable dispense height, with touch-free sensor operation allowing for ultimate cleanliness, safety and an innovative user experience.

RPW9 Features:

- Touch-free sensor operation
- Innovative design and technology
- Single-point-dispense for modern aesthetic
- LED UV helps maintain system cleanliness
- Extra large dispensing area 12.25", perfect for large bottles and cups
- Simple & improved leak-stop lowers operating costs
- Increased dispense rate ideal for filling larger bottles
- Stainless steel reservoirs
- Large capacity drip tray
