RPW14 Elite Cooler

The RPW14 High capacity cooler uses state-of-the-art reverse osmosis purification to produce tulip ice and hot, cold, and ambient water from recessed spigots. Its ergonomic hight, touch-activated dispensing design offers no-back bending, sanitary dispensing. This model has the capacity to produce up to 44lb of tulip ice per day.

RPW14 Features:

- Hot, cold, and ambient water plus ice dispenser
- Elegant "tulip" ice
- Hands-free sensor technology for touchless dispensing
- Trusted and certified reverse osmosis filtration
- State-of-the-art reverse osmosis
- Leak protection system
- Eco-friendly energy saving mode
