

DI Combo Deionized/Distilled

Elevate your medical, or laboratory efficiency with Refresh Pure Water's revolutionary Deionized (DI) water system. With pre carbon, sediment filter, reverse osmosis (R/O) filter and deionization filter, your business can have access to unlimited deionized water produced on site.

Perfect for busy medical practices, dental offices, or veterinary clinics, our cutting-edge DI water system boasts an under-sink bladder tank for ample storage and a dedicated faucet for effortless dispensing, ensuring a consistent supply of medical-grade DI water for essential tasks.

Plus, our advanced technology guarantees consistently zero Total Dissolved Solids (TDS) – perfect for your critical autoclave and other sensitive processes.

Experience the benefits:

Cost-effective: Eliminate jug deliveries and enjoy on-site production.

Convenient: Access unlimited, always-available DI water through a dedicated faucet.

Reliable: Enjoy peace of mind with a system built for consistent performance.
